

The Navy is not following procedure and is simply in the process of making the data fit their wants. The following information is a quote from the OLF Siting Study, May 2003, Page 49.

“Sandbanks Site

Development Constraints:

Federally protected red-cockaded woodpecker (75 DNL contour)

Communities along US Route 13 (75 DNL contour)

Chowan Swamp Game Lands (70 and 75 DNL contour)

Recommendations:

No further action

Large area of state land, 70 DNL contour

Large wetlands area (bird habitat) in 70 DNL contour, a potential **flight safety concern.**”

The Sandbanks Site was taken off the list in 2003.

None of these factors have changed.

It should be taken off the list again.

Taxpayer money should not be used for ANOTHER study of this site.
